Profile Summary

Electrical Engineer currently studying Master's Degree in Manufacturing Systems Engineering, with hands-on experience in power systems, industrial automation, and process plant installation. I bring a strong foundation in electrical design, cable sizing, equipment installation, lean manufacturing practices, and project planning. Motivated by innovation and sustainability, I'm passionate about delivering engineering solutions that improve industrial performance and positively impact communities. I work well in multidisciplinary teams, quickly adapt to new technologies, and stay committed to continuous learning and professional development. With strong ethical values and a proactive mindset, I aim to lead and contribute to high-impact projects that shape the future of engineering.

Skills

- Project Planning and scheduling
 - Proficient in Ms Word, Excel, PowerPoint and Access
 - Proficient in CATIA/AutoCAD/Edraw drawing.
 - Troubleshooting motor-related issues and diagnosing problems.
 - Lean Manufacturing
 - Maintenance management
 - Microcontroller programming (e.g., Arduino, raspberry pie)
 - Problem solving
 - Electrical Machines and Drives
 - Control Systems
 - Good Communication
 - Creating budgets
-

Education

- MSc degree in Manufacturing Systems Engineering, University of Zimbabwe (Masters - *first class*), 2026
 - BSc Honours degree in Electrical Engineering, University of Zimbabwe (Degree- *upper second class*), 2023
-

Professional Experience

Bravura Zimbabwe

Junior Engineer

Graduate Trainee

Harare, Zimbabwe

June 2023 to Present

May 2023 to April 2025

- Key Electrical Engineer in the installation and commissioning of a crucial lithium processing and 6MW generator power plant project at Kamativi, leading technical design and coordination tasks across multiple project phases.
- Designed trench layouts for HV and LV cable routing, conducted cable sizing calculations, and led the termination and connection of power and control cables in collaboration with other teams.
- Generated Bills of Quantities (BoQs) and developed quotation documents for major electrical installations, ensuring cost efficiency and specification accuracy.
- Created detailed electrical drawings and schematics (AutoCAD) for the Bravura Kamativi Lithium Processing Plant, Power Generation Facilities, Campsites, and Office Buildings.
- Supported project planning and scheduling, contributing to on-time delivery and resource optimization.
- Researched and evaluated power supply solutions for the Selous Platinum Project, focusing on technical feasibility, load profiling and cost-benefit analysis aligned.

- Supervised subcontractors and site electricians, enforcing quality control, safety compliance (SHEQ) and timely execution of tasks.
- Coordinated procurement of critical materials and long-lead items to ensure seamless project continuity and inventory control.
- Provided hands-on support during the installation of generators, switchgear and cable terminations for the concrete batch plant, block moulding plant, and main power distribution systems.
- Participated in risk assessments, toolbox talks and safety audits to maintain a high standard of workplace safety culture.
- Handling work requests received by the department.

Delta Beverages (Chibuku Harare Brewery)

Industrial Attachment

Harare, Zimbabwe

March 2021 to February 2022

- Carry out weekly and monthly Preventive Maintenance and respond to breakdown.
- Planning and scheduling of all maintenance activities including condition monitoring and lubrication.
- Problem solving in conjunction with other Engineers.
- Installation and commissioning new equipment.
- Planning for major equipment overhauls.
- Troubleshooting motor-related issues and diagnosing problems.
- Regular checks on safety protection systems
- Prepared weekly and monthly reports.
- Usage of Computerized Maintenance Management System (SAP).
- Create requisition forms (IPOR) and contribute to the overall documentation management system.
- Expertise in housekeeping and cleanliness practices, including the implementation of 5S methodology
- Adhere to safety protocols and regulatory requirements in all engineering activities. Participate in safety training programs, contribute to risk assessments, and help maintain a safe working environment

Certification and licenses

Class 2 Drivers licence, (2018)

33kV switching course certificate, ZESA National Training Centre.

Basic First Aid, Red Cross.

Professional Memberships and Affiliations

Zimbabwe Institute of engineers (ZIE)

Presentations and Publications

University of Zimbabwe -Presented a project at the Research Innovation and Industrialization Week, 2021
